

Northwest
Gifted Child
Association
was founded
in 1963.

Mission.

To support highly capable/gifted children by:

- Supporting parents
- Disseminating information
- Encouraging development and maintenance of programs for gifted students
- Supporting legislation

What We Do

- Publish a newsletter with local, state and national resources
- Provide crucial information to parents, educators, community organizations, government offices, state superintendent's office on needs of gifted children and how to meet those needs.

Why Join?

Parents need a voice at the state level as well as a way to connect on a local level.

Parents are vital to ensure gifted programming remains a priority.

Why come to CONNECTIONS?

- Do you have questions about your child's exceptional abilities and differences?
- How often can you talk with educators and other parents who understand about the joys and challenges of raising a high-ability child?
- Spend half a day reminding yourself of the joys of raising a high-ability child.

KEYNOTE SPEAKERS

Nancy Cartwright, PhD will open the symposium with her keynote *Beyond Boredom and Anxiety: Connecting Learning to Life for Gifted Students*. Dr. Cartwright will help parents understand some of the reasons behind gifted student boredom and

anxiety. Her interactive message will also provide guidance in developing a *learning engagement action plan* to connect gifted students to their educational experiences and life beyond school.

Steven Curtis, PhD will close out the morning with his keynote entitled *"Continually Motivated to Learn"*. Dr. Curtis, author of the book, *Understanding your Child's Puzzling Behavior*, is a licensed child clinical psychologist and nationally certified school psychologist in full-time private practice on Bainbridge Island, WA.

Breakout sessions will combine presentations with facilitated dialogue among attendees.
